PATECHT NO. USZŐÖZ0157120A1

GENERAL INFORMATION:

APPLICANT: THE REGENTS OF THE UNIVERSITY OF CALIFORNIA

APPLICANT: Tsien, Roger Y.

APPLICANT: Baird, Geoffrey

TITLE OF INVENTION: CIRCULARLY PERMUTED FLUORESCENT PROTEIN INDICATORS

FILE REFERENCE: REGEN1470-1

CURRENT APPLICATION UNMBER: US/09/99,745

CURRENT FILING DATE: 2001-10-23

PRIOR APPLICATION NUMBER: 09/316,920

PRIOR APPLICATION NUMBER: 09/316,920

PRIOR FILING DATE: 1999-05-21

NUMBER OF SEO ID NOS: 67

SOFTWARE: PatentIn version 3.0

GENERAL INFORMATION
GENERAL INFORMATION:
APPLICANT: University of Rochester
APPLICANT: Zauderer, Maurice
APPLICANT: Ernest S. Smith
TITLE OF INVENTION: In Vitro Methods Of Producing And Selecting
TITLE OF INVENTION: Immunoglobulin Molecules In Eukaryotic Cells
FILE REFERENCE: 1821.0070004
CURRENT APPLICATION UNMEER: US/09/987,456
CURRENT FILING DATE: 2001-11-14
                                                                                                                                                                   Sequence 11, Application US/09987456 Patent No. US20020123057A1
                                                                                                                                                                                                                                                                                                                                                       Matches

EDUCATION: THE CYS-169-SH OF THE OTHER PRIMARY SIDURITY OF ORMAN.

SEQUENCE FROM N.A.

A MARCHALS V., COULDING SIDURITY ANTIOLIDARY WHICH CONSTITUTES

SUBmitted (MAY-1999) to the EMBL/GenBank/DDBJ databases.

SUBMITTED (MAY-1999) to the EMBL/GenBank/DDBJ databases.

I SUBMITTED (MAY-1999) to the EMBL/GenBank/DDBJ databases.

C AN ENZYMATIC DEFENSE AGAINST SULFUR-CONTAINING WHICH CONSTITUTES

AN ENZYMATIC DEFENSE AGAINST SULFUR-CONTAINING OXIDATION SYSTEM BUT

C NOT AGAINST AN OXIDATION SYSTEM WITHOUT THIOL.

C I-! SUBUNIT: HOMODIMER; DISULFIDE-LINKED, UPON OXIDATION.

C -!- SUBCELIULAR LOCATION: CYCOPLASMIC.

C -!- SUBCELIULAR LOCATION: CYCOPLASMIC.

C -!- SUBCELIULAR LOCATION: CYCOPLASMIC.

C -!- SUBCELIULAR LOCATION: CYCOPLASMIC.

C -!- SUBCELIULAR LOCATION: TO THE PRIMARY SITE OF OXIDATION.

BY THORESOXIN.

C -!- SIMILARITY: BELONGS TO THE AHPC/TSA FAMILY.
        Query Match 2.5%; Score 8; DB Best Local Similarity 100.0%; Pred. No. 1. Matches 8; Conservative 0; Mismatches

1: FUNCTION: REQUIRED FOR CELLULAR MORPHOGENESIS AND POLARIZATION OF -IP-FUNCTION: REQUIRED FOR CELLULAR MORPHOGENESIS AND POLARIZATION OF FUNCTIONS CONTICAL CYTOSKELETON. IT MIGHT ACT IN CONCERT WITH PROTEINS SUCH AS CIDC42 AND CIDC43 TO LIMIT THE REGION OF CORTICAL PATCH FORMATION TO THE CORTEX OF THE BUD. REQUIRED FOR THE ACCUMULATION AND/OR MAINTENANCE OF PLASMA MEMBRANE H(+)-ATPASE ON THE CELL
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  173
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | PVVQQPAP 180
